EXPERIENCE

09/2025 - present

DevOps Engineer- EDAG Group

- Designed and maintained CI/CD pipelines using Azure DevOps to automate build and deployment workflows, improving release speed, deployment consistency, and operational excellence.
- Managed Kubernetes-based production environments with a focus on service reliability, monitoring, incident response, and operational stability.
- Developed Python automation scripts to reduce manual operational tasks and improve deployment efficiency.
- Designed Splunk dashboards, monitoring alerts, and operational reports to enhance incident detection, proactive monitoring, and root cause analysis across production systems.
- Led a production support team responsible for incident management, on-call support coordination, and maintaining production stability in alignment with SLA/SLO objectives.
- Collaborated with development and operations teams to improve deployment reliability and reduce incidents.

08/2023 - 09/2025

Technical Engineer- Polestar Consultancy Pvt. Ltd.

- Worked on integrating RESTful APIs for communication between front-end and back-end (Flask, ExpressJS) and implemented authentication and authorization using JWT / OAuth.
- Created and managed backend servers using Node.js and Express.js, implementing robust server side logic.
- Built dynamic web applications and single-page applications using Django, FastAPI, Vue.js, and React.js.
- Designed and implemented front-end interfaces using HTML, CSS, SASS, Bootstrap, Tailwind CSS, and Vue.js.

08/2022 - 03/2023

Consultant - Web/App Development - UpWork - Global

- Advised on technical integrations of MongoDB applications with NodeJS and Python Web applications.(django, ExpressJs, VueJs, ReactJs, NextJs)
- Developed RESTful APIs using Express, Fastify, and FastAPI frameworks.
- Leveraged expertise in SQL (PostgreSQL) and noSQL (MongoDB) to drive integration in diverse process areas, by designing and managing Databases. (mongoose odm, prisma, sequelize for node: pymongo for python)
- Deployment and maintenance on cloud platforms Heroku, Netlify and DigitalOcean

05/2018 - 08/2021

IT Manager System Architect Fahrrad XXL - Dresden, Germany

- Led digital transformation by integrating Microsoft Dynamics CRM, Zendesk, and Cisco Contact Center, resulting in a 40% reduction in customer support response time.
- Developed and deployed internal inventory and asset management tools using C# (.NET) and Snipe-IT, automating tracking for 1,500+ hardware assets
- Implemented Azure AD-based authentication across company systems, improving security and simplifying onboarding processes for 300+ employees.
- Coordinated cross-departmental IT strategy, aligning tech initiatives with business goals and reducing annual infrastructure costs by 20%

TECHNICAL SKILLS

Cloud & DevOps	Azure DevOps Docker Kubernetes CI/CD Pipelines GitHub Actions Linux Administration Bash/Shell Scripting
Monitoring & Observability	Splunk Log Analysis Incident Management Alerting & Dashboards
Programming	Python JavaScript TypeScript C#
Backend	FastAPI Flask Node.js Express.js
Frontend	React.js Vue.js Tailwind CSS Bootstrap
Databases	MongoDB PostgreSQL

ACQUIRING SKILLS

- AZ-900
- Splunk Core Certified Power User

EDUCATION

2018	Bachelor of Science Mechanical Engineering TU Dresden - Dresden, Germany Coursework in Produktionstechnik
2013	Studienkolleg Science University of Leipzig , Leipzig, Germany
2010	Higher Secondary School Certificate Science P. Jog Junior College Pune, India
2008	Secondary School Certificate Loyola High School Pune, India

ADDITIONAL INFORMATION

- Executive Vice President, Indian Association Dresden e.V. (2017 - 2023)
- Technology Expert Club 11 e.V. (2015 - 2022)
- Head of Finance IAESTE LC Dresden e.V. (2018)
